

POWER-SPRAYS

Cast Premix GRC Equipment Package

GRC125 Combination Mixer

Premix GRC is based on a high strength low water/cement ratio mortar. This is prepared at high speed. The Alkali Resistant Glass fibre reinforcement is then blended into the mortar at slow speed. Power-Sprays build a range of mixers, as well as manual and automated batching systems

WAAPS 3000 Liquid Dispensing System

Accurate control of water, polymer and admixtures is essential for good quality control. The new WAAPS 3000 weighed dispensing system can be programmed to accurately and precisely dose up to 4 liquids for up to 30 different mix designs

Vibrating Table

Power-Sprays construct a range of Vibrating Tables specifically designed for Premix GRC. Tables are fitted with adjustable amplitude vibrators with the option of variable frequency control systems to ensure efficient compaction.

Hand Tools and Accessories

Slump Test Kit

MK3 Powertex Facing Coat Spray Gun

"Wash Out" Test Baskets
