

Fibre Loss-In-Weight Monitoring System

Measure, Monitor, and Maintain Your Fibre Usage with One Device.

POWER-SPRAYS

Simple, user-friendly interface designed for efficient monitoring of fibre usage

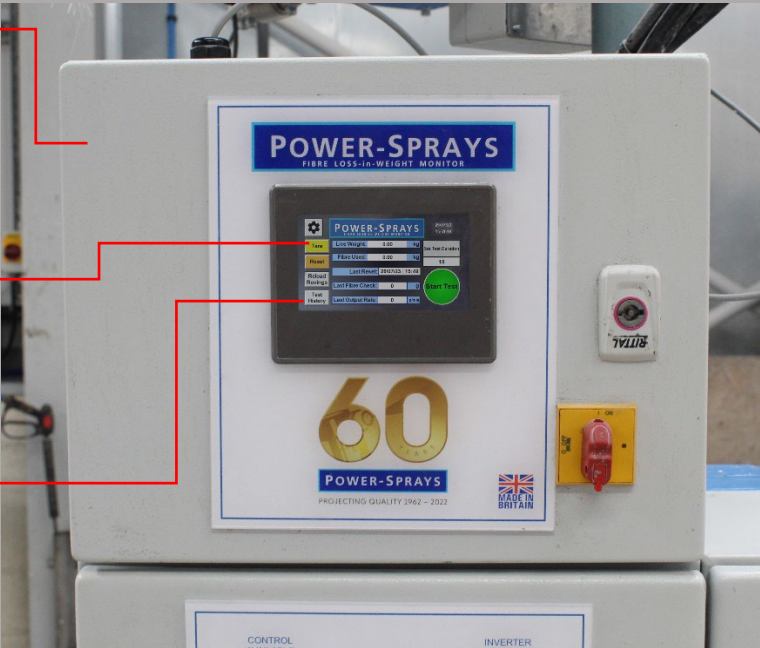

Ability to log and access fibre usage history in order to track Spray Station performance

Easy integration into existing GRC Spray Stations

Precise tracking of live weight of fibre

Save fibre by completely eliminating the need for a bag test

Introducing the new Power-Sprays *Fibre Loss-In-Weight Monitoring System*, the future of GRC Spray Station calibration.

Bag tests are now a thing of the past with this innovative and resource-efficient method of accurately measuring your fibre output.

This piece of equipment can be easily installed onto your GRC Spray Station from where it can measure, monitor, and maintain your fibre usage – eliminating the need for wasteful bag tests. Simply set your test duration on the user-friendly interface and precisely track your fibre usage - saving time and materials and allowing for accurate fibre dispensing during spraying operations.
